

Emergency Paediatric First Aid

Overview

Our Emergency Paediatric First Aid (PFA) course has been designed in line with the criteria for effective PFA training set out in the Department for Education's "2017 Statutory Framework for the Early Years Foundation Stage" for workers caring for young children in the absence of their parents.

The course is fun, practical and informative and is made relevant and appropriate for those working with children from birth to age 5.

Our training courses are simulation led, so you will take part in practical scenarios and make use of training equipment based on babies and small children to make the course as interesting and engaging as possible.

We practice continual assessment on this course, so your participation and skills will be monitored throughout the day and upon successful completion of the course you will receive a Back to Life certificate, valid for 3 years from the date of issue.

Course Content

Upon completing this course you will be able to:

- Assess an emergency situation and prioritise what action to take
- Help a baby or child who is unresponsive and breathing normally
- Help a baby or child who is unresponsive and not breathing normally
- Help a baby or child who is having a seizure
- Help a baby or child who is choking
- Help a baby or child who is bleeding
- Help a baby or child who is suffering from shock caused by severe blood loss (hypovolemic shock)

Type of Course: Theory and practice

Duration: 6 hours / 1 day

Maximum Number of Candidates (Per Trainer): 10

Certification: Delegates who successfully complete the course receive a Back to Life certificate (verifiable for health professionals for continuous professional development) valid for 3 years.

Recertification It is recommended that candidates attend annual updates to maintain their Basic Life Support and Defibrillation skills, and repeat the full 6 hour course every 3 years.
